※ Common Error & Solutions (Pop-up messages will appear)

- **“Exceeded maximum enrollment (cannot apply for more courses)”**

  : This appears when you've reached your credit limit.

  📌 **Solution:**

  Remove a course from your Applied List or Waiting List by clicking the “Cancel” button to free up a slot before applying for another course.

  Additional seats may become available later — check back periodically.

  📌 **Important:**

  The combined total of applied and waitlisted courses cannot exceed the number of courses you have paid for.

  Example: If you paid for 2 courses and are registered for 1 + waitlisted for 1, you must cancel one before adding another.

- **“There is a time overlap in the course selection”**

  : This message appears when the selected course schedule overlaps with a registered one. The Yonsei Portal system does not allow enrollment in two courses at the same time.

  📌 Solution: Review the schedule of your registered and waitlisted courses. Select only one course per time slot, and double-check your timetable before finalizing registration.

- **“Automatic Log-out”**

  : Your browser may **log out automatically** if a **session timeout** occurs due to inactivity or if you log in with your **student ID** from another device.

  📌 Solution: Try logging in again and ensure your password is correct. Or clear your browser history and cache.

- **“Course enrollment unsuccessful due to course time conflict. Apply for another course.”**

  : This error appears when the course you selected overlaps with a course you are already registered for or waitlisted in.

  📌 Solution: Check the schedule of your registered and waitlisted courses. Cancel the one causing the conflict, then apply for your preferred course.

- **“Already enrolled in the course”**

  : This message indicates that you are already registered for this course or currently on the waitlist. Note that this does not confirm successful enrollment — please verify your status under "List of Applied Courses."

  📌 Solution: Check your registration status under "List of Applied Courses" or "Waiting List." If the issue persists, try clearing your browser cache and logging in again.
